DETAILED ACTION

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Osborn US Patent No. 6,931,555 B2.

Consider **Claim 1**, Orborne teaches a method comprising: a surface management system exchanging information with a power management system of a device (i.e., power controller is coupled to a plurality of power modules) (i.e., see at least abstract, col. 2 lines 29-31, col. 4 lines 13-20, and claim 1), to allow the two systems to communicate (i.e., it sends signals indicating whether or not it wishes to make use of the component coupled to that power controller) (i.e., see at least abstract, col. 2 lines 29-31, col. 4 lines 13-20, and claim 1).
